Description

Delafloxacin, also known as Baxdela, is a popular antibiotic with the chemical formula C₁₈H₁₂ClF₃N₄O₄. It is used to treat skin infections from both gram-positive and gram-negative bacteria.

Delafloxacin can be retained and analyzed on a Primesep 100 mixed-mode stationary phase column using an isocratic analytical method with a simple isocratic mobile phase of water, Acetonitrile (MeCN), and a sulfuric acid (H₂SO₄) buffer. This analysis

method can be UV detected at 290 nm with high resolution and peak symmetry.
